

# Muhammad Sufyaan Khateeb

## Full Stack Developer – Java | Spring Boot | React.js | Microservices | Cloud

+91 9591135172    @sufyaankhateeb@gmail.com    https://www.linkedin.com/in/sufyaan-khateeb-0aba27208  
https://github.com/SufyaanKhateeb    Bengaluru, India    https://leetcode.com/sufyaankhateeb/

### PROFESSIONAL SUMMARY

- Versatile **Full Stack Developer** with hands-on experience in developing **secure, scalable, and high-performance web applications** using **Java, Spring Boot, React.js, PostgreSQL, and microservices architecture**. Strong expertise in both **backend system design** and **frontend UI development**. Contributed to key product integrations at **CAST Software**, including **secure authentication flows, distributed job schedulers, and performance optimization** through close collaboration with backend teams. Adept at **CI/CD, cloud deployment**, and working in **collaborative Agile environments**.

### TECHNICAL SKILLS

#### Frontend

React.js, JavaScript (ES6+), TypeScript, Tailwind CSS, Zustand

#### Architecture

Microservices, API Gateway, OAuth2, SSO, Reverse Proxy

#### DevOps

Docker, Kubernetes, Jenkins, GitHub Actions, Nginx

#### Other

Multithreading, CI/CD, Agile, System Design

#### Backend

Java, Spring Boot, REST APIs, Hibernate, JPA

#### Databases

PostgreSQL, MySQL, MongoDB

#### Cloud

AWS, GCP, Heroku

#### Problem Solving

500+ problems solved on **LeetCode (@sufyaankhateeb)**

### EDUCATION

#### 2019 - 2023

Bengaluru, India

- B.E. in Information Science  
**M.S. Ramaiah Institute of Technology**  
CGPA **8.82 / 4.0**
  - Relevant Courses:** Cloud Computing, System Design, Machine Learning, Algorithms

### PROFESSIONAL EXPERIENCE

#### 09/2023 - Present

Bengaluru, India

- Junior Full Stack Engineer  
**CAST Software**
  - Developed** a microservices-based unified platform to integrate CAST products under one UI, **improving deployment efficiency and product cohesion**.
  - Created** dashboards, admin views, and secure auth flows using React, Spring Boot, and OAuth2, **securing access for 100+ enterprise users**.
  - Collaborated with backend teams** to implement caching and compression, **reducing UI load times by 75%**.
  - Implemented** reverse proxy configurations and unified OAuth2/SSO flows to streamline service access.
  - Partnered with security teams** to eliminate CVE vulnerabilities and **enforce license authorization across multi-node deployments**.
  - Supported enterprise delivery** for high-profile clients including **Google Cloud, US Army, and US Air Force**.

#### 01/2023 - 08/2023

Bengaluru, India

- Software Engineering Intern  
**CAST Software**
  - Built a multithreaded log parser, improving system throughput by **3x** and reducing latency by **60%**.
  - Developed a VS Code extension to automate CI workflows, **reducing developer task time by 90%** and boosting productivity.

### CERTIFICATION

#### React

The Complete Guide (Redux incl.)

#### Spring Boot certification

# PROJECTS

## Placement App (Fullstack)

React, Golang, Zustand, REST API, Auth

- Engineered a full-stack placement portal used by **500+ students**, streamlining end-to-end job application flow.
- Delivered both frontend dashboards and backend services, **achieving 95% user satisfaction** and **reducing admin workload by 70%**.

## Real-Time Chat App (Fullstack)

Node.js, WebSocket, Express, React

- Developed a secure real-time chat app with custom authentication and socket-based communication, improving real-time collaboration.

## Portfolio Website

🔗 <https://github.com/SufyaanKhateeb>

Next.js, Zustand, React Query, GSAP

- Built and deployed a responsive, animated portfolio website with GitHub integrations.
- Implemented scroll-based animations and performance optimizations; **garnered 800+ unique visits in the first month**.
